

Dear Judiciary Committee:

I am writing asking your support of the S. 3155, the Juvenile Justice and Delinquency Reauthorization Act of 2008. Young people are a national asset and are desperately needed to help this country remain strong and progressing! Youth within in the juvenile systems of this country especially need our support to become the engaged positive citizens contributing to our communities instead of becoming a burden to society. I have worked with young people within the juvenile system in Indiana and have discovered that many of them have a basic human need to give back to their communities and given the support to do so, will do remarkable community service! Please support this bill and provide the opportunity you would want if you were in their place to live a productive meaningful life!

A Hoosier that believes that all young people deserve the best care we can give them so they can pass it on to future generations!
